

ULTRASEAL SYSTEM BUILD-UP

VERTICAL & WINDOW, DOOR TERMINATION

VERTICAL TERMINATION

Where waterproofing on upstands and columns will be terminated on the vertical, a 5 mm wide x 5 mm deep termination groove must be cut into the wall to allow for successful anchoring of the waterproofing system.

Termination Groove

WINDOW / DOOR TERMINATION

Termination must be finished with a Polyurethane bead along the bottom interface.

Polyurethane Bead

Waterproofing Tucked In
Under The Window / Door Frame
